RE: 1981 Hazardous Waste Annual Report

Dear Mr. Johnson:

We recently received the 1981 Hazardous Waste Annual Report for activities conducted at Chevron Chemical's, Council Bluffs warehouse. The report lists EPA Hazardous Waste Identification Numbers (D002, P004, U239) that were not included on your initial notification filing. Subrule 400--45.8(455B) of the Iowa Administrative Code requires that anyone who plans to generate a hazardous waste must file a notification prior to initiating that activity.

It is our understanding Chevron's warehouse is scheduled to close in July. If, prior to closing this facility, you expect to generate hazardous wastes that were not included on your initial notification we would strongly suggest completing the attached notification form and return it to this office.

If you have any questions concerning this letter or your hazardous management responsibilities, please do not hesitate to contact me directly.

Sincerely,

AIR AND LAND QUALITY DIVISION

Rod Vlieger, P.E.  
Chief, Solid Waste Section

uled to close approximately 7/1/82.

Attached is copy of Annual report for Cherron. A couple of wastes are listed that were not included on their initial notification. I'm going to take care of them on this end.

I reviewed the file. Your Nov 81 inspection indicated the Facility was going to close in March 82. Annual report changes this to July 82. Since a number of the admin. requirements were waived you may want to reconsider your position concerning this Facility due to the change in closing date and the amount of acute toxic wastes being handled.
